

# PlanSwift 9.x Plugin Version 1.9 Release Notes

## Send To ProjectPAK Plugin

1. Added a new option for sending a PlanSwift takeoff to ProjectPAK. Starting with this release, we can add items to an existing ProjectPAK estimate underneath the estimate's Base Bid folder.

2. In the prior releases, the PlanSwift plugin always sent the entire PlanSwift takeoff over to ProjectPAK. Starting with this release, you can now select a subset of takeoff items for transfer over to ProjectPAK. Note, you can still send the entire PlanSwift takeoff to ProjectPAK.

Takeoff items to send to ProjectPAK	
Selection	Previously Sent
WALLS	Oct 2, 2014
PLUMBING	No

Select the folders that you want to send to ProjectPAK by dragging them on to the new grid we've added to the plugin. A nice feature we've added is if a PlanSwift job has been previously sent to ProjectPAK, we color the folders green to identify folders previously sent.
