

## **MvLink Installation Instructions**

1. Click the Download button. Once downloaded, open the MvLink.zip file and double-click MvLink.exe to begin installation. You'll be prompted for the password that was provided to you. Click Run, if prompted, and follow the instructions on the screen. We recommend keeping the installation defaults.

Note: If you are running Windows 7 or higher, it is highly recommended that you start the installation program by right-clicking on it and choosing the Run As Administrator command.

You must be logged on as the actual user when installing the program. If the actual user of the PC does not have install permissions, you can install via an Administrative logon, however, you'll need to call TradeSoft support to manually set up the ODBC data source configuration.

5. Start MV Link by selecting **Start | Programs | MV Link | MV Link**. You should see the MV Link window display. Make sure you read the MV Link user's guide before attempting to use it. You can access the MvLink User's Guide either via the MvLink Start menu folder or inside MvLink by going to **Help | User's Guide**.
