ShopPAK Mobile Installation Instructions

Click the Download button. Once downloaded, open the ShopPAK Mobile.zip file and double-click ShopPAK Mobile.exe to begin installation. You'll be prompted for the password that was provided to you. Click Run, if prompted, and follow the instructions on the screen. We recommend keeping the installation defaults.

The installation utility installs the Apache Web Server, ShopPAK Mobile PHP scripts, and the ShopPAK Mobile Controller on your computer(s). You can install everything on the *same* PC/Server, or you can install the Apache Web Server and PHP scripts on one PC/Server, and the ShopPAK Mobile Controller on a different PC/Server.

Note: The ShopPAK Mobile Controller must reside on the same PC/Server that the shared ShopPAK database is installed upon.

The installer places files in the following folders:

C:\apache	Apache Web server and ShopPAK Mobile PHP scripts
C:\php	PHP executables to interpret PHP scripts
C:\MDC Controller	ShopPAK Mobile Controller

Double-click on the ShopPAK Mobile.exe file to start the install. The Welcome Screen displays.

The next screen allows you to select if you want to install everything on one target PC/Server, or separate PC/Servers. You can install the Apache web server and PHP scripts on any PC/Server, but the MDC Controller *must be installed* on the same PC/Server that you installed the ShopPAK shared database on.

Setup - ShopPAK Mobile
