

Scoreboard Version 2.0 Release Notes

Enhancements

- Added 4 new tabs to Scoreboard: Jobs, Job Items, Operations, and Materials.

Displays job level data, as well as, Job Item information under a job, and within Job Item, Work Order information. Although Job Item and Work Order information is redundantly stored elsewhere in Scoreboard, we've added it on the Jobs tab to make it faster to drill down into the ShopPAK job tree hierarchy. Many fields can be updated. Here is the list of job columns available on the new job grid:

<input checked="" type="checkbox"/> Job ID	<input checked="" type="checkbox"/> Not Firm	<input checked="" type="checkbox"/> Finished Goods - Act

Added work order count by status to give users a quick view of a job's work orders:

Work Order Count										
Pend	Eng	Pur	Rdy	Rel	Cmp	Shp	Inst	Inv	Paid	
0	0	0	0	0	4	0	0	0	0	0
0	0	0	2	0	0	0	0	0	0	0

The materials grid is a great tool for tracking material as it relates to a specific work order, job item, and job.

2. Added job cost data to the work order tab:

Job Costs			Hours			
Sell Price	Completed	Backlog	WO Est	PPAK Est	Actual	Diff
\$15,441.66	\$1,544.17	\$13,897.49	130.37	130.37	9.33	121.04
