

MvLink Installation Instructions

1. Click the Download button. Once downloaded, open the MvLink.zip file and double-click MvLink.exe to begin installation. You'll be prompted for the password that was provided to you. Click Run, if prompted, and follow the instructions on the screen. We recommend keeping the installation defaults.
2. Start MV Link by selecting Start | Programs | MV Link | MV Link. You should see the MV Link window display. Make sure you read the MV Link user's guide before attempting to use it. You can access the MvLink User's Guide inside MvLink by going to Help | User's Guide.
